

Uttam Kumar Varma Vummididevu

Portfolio | Leetcode | uttamkumarvarma9915@gmail.com | +1 3142034984 | [Linkedin](#) | [GitHub](#)

Skills

- **Programming Languages:** [Java](#), C++, C#, [JavaScript](#), [Python](#), [SQL](#).
- **Software Testing Techniques and Tools:** [Manual Testing](#), [Automation Testing](#), [API Testing](#), Database Testing, User Acceptance Testing, [Selenium](#), [Playwright](#), [TestNG](#), Junit, Pytest, BDD, SpecFlow, Cucumber, CodeceptJS, Rest Assured, [SOAPUI](#), [Postman](#), TestSprite, Evomaster
- **Machine Learning:** Pandas, NumPy, Random Forest, Flask API Integration, Joblib Model Serialization.
- **Other Skills:** AWS (S3, RDS, EC2), CI/CD, Jenkins, Snowflake, Git, Agile, JIRA, SDLC

Work Experience

Company – BigCommerce | Projects – EIP & EDM | Role – Quality Engineer Jun 2024 - Present

Tools & Frameworks: AWS (Glue jobs, S3, Cloud Watch), Salesforce, Snowflake, Marketo, Data Lake, Python, Javascript, Testsprite, Evomaster, SOQL, CodeceptJS, Visual Studio, and Git.

- Perform API and UI automation using **CodeceptJS** with a **BDD-style framework** to validate end-to-end workflows and system behavior across integrated platforms.
- Led **data migration** efforts between **Legacy Salesforce** and **TFM Salesforce**, handling **300K+ records** along with child objects (some containing **1M+ records**); performed **Data Validation Rules**, **Custom Objects & Fields Testing**, **Data Reconciliation**, and **Data Anomaly** to ensure consistency, completeness, accuracy, and integrity across source and target systems.
- Performed **System Integration Testing** to validate end-to-end integration across Salesforce systems
- Developed **Python automation** to streamline data migration documentation, reducing effort by **70%**

Company – ZenQ (a Qualitest Company) | Project – NIAD Systems | Role – SDET Jan 2021 - Jul 2023

Tools & Frameworks: C#, Selenium, Visual Studio, Git, Spec-Flow, Postman, and Rest Assured.

- Verified each requirement and executed test cases based on **Equivalence Class Partitioning**, **Boundary Value Analysis**, **Decision Table**, and **State Transition** techniques as per the test plan.
- Implemented **parallel testing** using **8 threads**, significantly reducing the overall testing duration.
- Implemented **Gmail** automation using **APIs** and enhanced automation framework with new methods.
- Actively contribute to **agile ceremonies (sprints, stand-ups, and retrospectives)**, offering insights into testing processes and improving the team's overall workflow.

Company – TekSpace Inc | Project - Asset Vantage | Role – Automation Test Engineer May 2020 - Dec 2020

Tools & Frameworks: Selenium, Eclipse, Java, SQL, Git, Cucumber, Jenkins & J-Unit

- Executed manual and automation test cases and managed **Automation Test Scripts** utilizing **Selenium WebDriver**, **Java**, and **Junit** and used **docker** for cross browser test script execution.
- Performed **end-to-end testing** to validate the entire workflow of the application.
- Designed and implemented **BDD test scenarios** using **Cucumber** to enhance collaboration with business stakeholders, improving **test coverage** and **readability**.

Education

Saint Louis University, St. Louis, Missouri
Master of Science in Information Systems

GPA: 3.9/4.0

Academic Project

Project: [Health Predict - AI-Powered Disease Risk Assessment & Hospital Locator](#)

Tools & Frameworks: Python (Flask, Random Forest, pandas, NumPy, joblib), HTML, CSS, JavaScript, and Git

- Developed an AI-powered disease prediction tool (**Flask + Random Forest**) that analyzes user health metrics (**age/BMI/smoking status**) and returns potential risks with probability scores.
- Built a location-based **hospital finder** that filters CSV data by city and displays results in interactive HTML tables

Certifications

- [ISTQB - CTFI](#)
- [ISTQB – Agile Tester](#)
- [API Testing - Udemy](#)
- [Java - Scaler](#)
- [Project Management - Excelerate](#)
- [SQL & Security Testing - Udemy](#)
